Petition to the House of Commons

Whereas:

- Bill C-41 would permit MAID by advance requests for people with dementia and other capacity-limiting illnesses;
- Advance consent to receiving MAID under conditions that a person has never experienced is not real or informed consent;
- Canadians who have lost medical decision-making capacity require care and support, not MAID;
- People with dementia or other capacity-limiting illnesses may not wish to die after signing an advance request, yet be unable to communicate that change;
- Advance requests for MAID raise serious risks that deserve careful Parliamentary study, not a rushed bill;
- The United Nations Committee on the Rights of Persons with Disabilities recommended in 2025 that Canada refuse to allow advance requests for MAID;

Therefore we, the undersigned citizens and residents of Canada, call upon the Government of Canada to:

- Reject MAID by advance request.
